5. *Theol.* a. (*Doctrine of Merit.*) With the Schoolmen, the condition of its being 'congruous' that God should confer the 'first grace' in response, and in 'a certain equality of proportion', to the performance of good works by man. Opposed to Condignity.

Representing L. *congruitas*, used by Aquinas in stating that while 'condignity' can be attributed to meritorious works only as they proceed from the grace of the Holy Spirit, it yet 'seems *congruous* that a man, working according to his own virtue or power, should be recompensed by God according to the excellency of His virtue.' *Summa Theol.* Prim. Sec. Q. cxiv, Art. iii. Hence the expressions *meritum ex congruo*, *meritum congrui* 'merit (arising) out of congruity', 'merit of congruity'; *mereri* (*gratiam*, etc.) *de congruo* 'to merit (grace, etc.) from or of congruity'. (Some late writers have apparently confused the last with the 'congruity of efficient grace' in b.)

1553 *Articles of Relig.* xii, Workes done before the grace of Christe..are not pleasaunt to God..neither do thei make menne mete to receiue Grace, or (as the Schole auctheures saie) deserue Grace of congruitie [L. *neque gratiam, ut multi vocant, de congruo merentur*]. 1570 Foxe *A. & M.* 25 So that those works maie be meritorious, and of congruitie obteine grace. 1625 Ussher *Answ. H. Newman *Tract* xc. § 3 To deserve *de congruo* or of congruity, is to move the divine regard, not from any claim upon it, but from a certain fitness or suitableness: as for instance it might be said that dry wood had a certain disposition of fitness towards heat which green wood had not. 1846 Bp. H. Browne *On 39 Articles* Art. x, It being agreeable to His nature and goodness to bestow grace on those who make such [unassisted] efforts. Endeavours then on the part of man to attain to godliness were by the schoolmen said to deserve grace *de congruo*, *of congruity.*

b. (*Doctrine of Grace.*) The suitability or adaptation of divine grace to the character, nature, disposition, or other circumstances of the person called, to which some theologians attribute its efficacy (see Congruism); 'the efficacy of grace which acts while at the same time preserving the action of the free will' (Littré). A term belonging to the great controversy on Grace between the Dominicans and the Jesuits, which began c. 1580.

3. *Astrol.* and *Astron.* An apparent proximity of two planets or other heavenly bodies; the position of these when they are in the same, or nearly the same, direction as viewed from the earth.

Formerly, two planets were said to be *in conjunction* when they were in the same sign of the zodiac, or even in adjacent signs; in modern astronomy, the term is definitely restricted to their position at the moment when they are in the same longitude or right ascension. *Conjunction* is often used simply for *conjunction with the sun* of a primary planet (formerly also of the moon, in which case it is equivalent to 'new moon'). An inferior planet may be in *inferior conjunction*, i. e. between the earth and the sun, or in *superior conjunction*, i. e. on the farther side of the sun.

The earlier Eng. lexicographers, including Bailey, Johnson, Walker, Todd, Crabb, recognize *connexion* only. *Connection* appears in Webster (1828) who says 'For the sake of regular analogy, I have inserted *Connection* as the derivative of the English *connect*, and would discard *connexion*'. This preference has been followed by other dictionaries in U.S., and by some in Great Britain. Nomen connotativum, terminus connotativus were used by Occam *a* 1347: 'Nomen autem connotativum est illud quod significat aliquid primario et aliquid secundario' (Prantl III. 364).]

1. Having the quality of connoting; pertaining to connotation, or to an additional or implied signification.

Pusey* 14 Secondary, symbolical, connotative senses of Scripture.

2. *Logic. Connotative term*: according to J. S. Mill, a term or word which, while it denotes (or is predicated of) a subject, also connotes or indicates its attributes.

In the scholastic and later logic a connotative, as distinguished from an absolute, term was one which primarily signified an attribute and secondarily a subject. In the logic of J. S. Mill this usage is inverted; the subject is 'denoted', the attribute 'connoted'. Later still, the terms 'denotation' and 'connotation' have been used in a sense synonymous with logical 'extension' and 'intension' (cf. quot. 1876 in Connotation 2, and Fowler *Deduct. Logic* ii. (1887) 19).

1829 Jas. Mill *Hum. Mind* (1878) I. ix. 306 *Friend* is a concrete, connotative term .. Its connotation is dropped by another mark, the syllable *-ship*; thus *friendship*. 1846 J. S. Psychol.* II. vi. vi. 60 The subject and predicate of the major premiss are connotative terms. 1887 Fowler *Deduct. Log.* ii. 19 In the scholastic logic, what I have called attributives [i. e. adjectives and participles used adjectively] are alone recognised as connotative terms.

The Latin word was in common use in mediæval logic: app. first, according to Prantl, in Duns Scotus, and frequently in Occam, and so onwards in the terminology of the schools; thence it passed into English literary use; but its use as an English technical term of logic is recent, and due to Jas. and J. S. Mill.

1. *trans.* To signify secondarily or in addition; to include or imply along with the primary or essential meaning.

Iniq.* 271 Ὁ δράκων ὁ ἀρχαῖος connoting the Roman Empire as well as the Devil. 1693 South *Serm.* (1717) III. 434 Good .. over and above the bare Being of a Thing, Connotes also a certain sutableness or agreeableness of it to some other thing. 1872 M. Pattison *Ess.* (1889) II. 389 Deism .. connotes along with natural religion a negation of the truth or reality of the Christian revelation.

2. Of things or facts: To imply or involve as a consequence, condition, or accompaniment.

a 1655 Vines *Lord's Supp.* (1677) 160 A practical remembrance which connotes affections fruitful effect. *a* 1677 Barrow *Serm.* (1810) I. 128 This faith doth not only denote precisely .. such opinions and persuasions .. but doth also connote and imply such acts of will, as .. are naturally consequent upon them. 1757 Wesley *Wks.* (1872) IX. 243 But 'punishment always connotes guilt'. It always connotes sin and suffering; and here are both. 1867 *Sat. Rev.* 7 Dec. 719/1 A luxury which connotes a high condition of intellect and character, but still a luxury. 1878 Huxley *Physiogr.* xxi. 376 The descent of snow in one place connotes the evaporation of water in another locality.

†3. To combine in signifying (something); to mean in combination. *Obs.*

1786 H. Tooke *Purley* (1798) I. 305 The cypher, which has no value of itself, and only serves (if I may use the language of Grammarians) to connote and consignify, and to change the value of figures. 1805 *Ibid.* (1815) II. 437 Some Grammarians have said that an Adjective only connotes, and means nothing by itself.

4. *Logic.* (Of a term.) †a. With the earlier logicians: To imply or indicate the subject in which an attribute inheres, while primarily signifying or 'noting' the attribute itself. *Obs.* b. With J. S. Mill: To imply or indicate the attributes involved, while denoting (or being predicated of) the subject.

As to the change of use, see note to *Connotative term*, and cf. quot. 1829 with Heerebord above.

1829 Jas. Mill *Hum. Mind* (1878) I. i. § 5. 34 *note*, White, in the phrase white horse, denotes two things, the colour and the horse; but it denotes the colour primarily, the horse secondarily. We shall find it very convenient to say..that it *notes* the primary, *connotes* the secondary signification. 1846 J. S. Mill *Logic* I. ii. § 5 The word white, denotes all white things, as snow, paper, the foam of the sea, etc., and implies, or as it was termed by the schoolmen, *connotes*, the attribute of whiteness. *Ibid.*, The name..is said to signify the subjects *directly*, the attributes *indirectly*; it *denotes* the subjects, and implies, or involves, or indicates, or as we shall say henceforth, *connotes*, the attributes. It is a connotative name. *Ibid.*, Whenever the names given to objects convey any information, that is, whenever they have properly any meaning, the meaning resides not in what they *denote*, but in what they *connote*. 1887 Fowler *Deduct. Logic* ii. 19 A term may be said to *denote* or designate individuals, to *connote* or mean attributes or groups of attributes.

b. Hence, in general, non-technical use: To imply, include in its signification, convey to the mind or mean in actual use and application. (Often loosely used.)

1865 Kingsley *Lett.* (1878) II. 216 A man may believe the facts which the doctrine connotes without believing the doctrine. 1867 Lewes *Hist. Philos.* I. Introd. 64 The terms 'three and three' and 'six' denote the same relations, connote different ideas. 1871 Farrar *Witn. (ed. 2) 45 Characters which the name is not intended to connote. 1879 Farrar *St. Paul* I. 431 The word [Council] connotes a totally different order of conceptions to those that were prevalent at that early time.

Hence **Connoted** *ppl. a.*

1829 Jas. Mill *Hum. Mind* (1878) I. ix. 300 It is often highly convenient to drop the connotation; that is, to leave out the connoted cluster.

Conocuneus (kōˌnoˌkiūˈniˌŭs). *Geom.* [f. L. *cōn-us* Cone + *cuneus* wedge.] A surface generated by a straight line which constantly intersects a fixed straight line at right angles, and also constantly passes through the circumference of a fixed circle; i. e. a figure with a circular base like a cone, but having instead of an apex a ridge or edge like a wedge.

First treated of by Prof. J. Wallis of Oxford in 1662. In his definition the name is applied to one quarter of the whole solid, formed by two sections, parallel and at right angles, respectively, to the edge, and having thus one fourth of the curved surface, and three plane surfaces, one a quadrant of the circular base.

Gr. *κῶνος* cone + *ὀδοντ-* tooth.] A small conical tooth-like glistening body, found in Silurian and other ancient strata, and at first supposed to be a tooth of a cyclostomous fish; now more generally considered to be the remains of some invertebrate animal.

1859 Owen in *Encycl. b. Used as a distinctive surname or title of victorious princes; *esp.* in *Eng. Hist.* of William I, often referred to familiarly as 'the Conqueror'.

So far as English or AngloFr. evidence goes, there appears no reason to think that as applied to William I, this term or its corresponding med.L. *conquæstor, conquestor, conquisitor* (see CONQUESTOR) meant anything else than 'conqueror' in sense 1, =*domitor* or *expugnator Anglorum, triumphator Angliæ* of the contemporary chroniclers. The notion that *conquestor* had here only the sense of 'acquirer' or 'purchaser' as distinguished from 'inheritor' (see sense 2, and CONQUEST 5, in Scotch Law), appears to have been first started by Spelman (or his posthumous editors, whence it was taken by Blackstone and later writers. The historical evidence as to the use of the word shows that the appellation *Conqueror, Conquæstor* was applied to William the Great, just as to Alexander the Great, to Charles the Great, to Jayme I of Arragon (*el Conquistador*), etc.

Conquest (*kɒ·ŋkwest*), *sb.* Also 3–5 **conqueste.** [Represents two OF. words: (1) *conquest* (now *conquêt*) m.:—L. type **conquæstum* (cf. Pr. *conquist*, It. *conquisto*), med.L. *conquestum, -quistum*, for L. *conquīsītum*, neuter of pa. pple. of *conquīrĕre* (see CONQUER); (2) OF. *conqueste* (now *conquête*) fem. = Pr. *conquesta*, Sp., It., med.L. *conquesta, -quista*, fem. sb. from the pa. pple. (parallel to sbs. in *-ata, -ade, -ée*). The latter of these expressed the action, the former the proceeds of acquiring or conquering. Cf. *arquest*, OF. *aquest*, but *inquest, request*, OF. *enqueste, requeste. Conquêt, conquête* are still distinct in F., but in Eng., through loss of final *-e* and of grammatical gender, the two forms ran together at an early date.

The original sense in med.L. and F. was 'acquisition, esp. as the result of effort'; including getting by force of arms as well as by other means. Hence two lines of development: first, with the feudal jurists 'personal acquisition of estate, as opposed to inheritance', without specific reference to the mode, whether by force of arms, by grant, or (in later times) by money, called PURCHASE in English Law; secondly, 'acquisition by force of arms, military conquest'. The latter of these is by far the earlier in English, and has always been (with its transferred uses) the only popular sense. The general sense of acquisition and esp. the legal sense as opposed to inheritance, is chiefly Scotch and prominent in Scotch law.]

Conscience (*kɒ·nʃĕns*). Forms: 3– conscience, 3–6 concience, 4–6 conuiens, -cyens, -sience, -syence, -syens, -sciens, -scyence, (5 consions, 6 concyence, conchons, consyenes, sconscyence, 7 contience). [a. F. *conscience* (*cunscience*) 12th c. (= Pr. *conciencia, cossiencia*, Sp. *conciencia*, It. *cosciensa*), ad. L. *conscientia* privity of knowledge (with another), knowledge within oneself, consciousness, conscience, f. *conscient-* pr. pple. of *conscīre*, f. *con-* together + *scīre* to know; thus *conscīre alii* to know along with another, to be privy with another to a matter, thence, *conscīre sibi* to know with oneself only, to know within one's own mind.

In ME. *conscience* took the place of the earlier term INWIT in all its senses; cf. OHG. *giwizzida*, Ger. *gewissen*, conscience. The word is etymologically, as its form shows, a noun of condition or function, like *science, prescience, intelligence, prudence*, etc., and as such originally had no plural: a man or a people had *more* or *less* conscience. But in sense 4 it came gradually to be thought of as an individual entity, a member or organ of the mental system, of which each man possessed *one*, and thus it took *a* and *plural*. So *my conscience, your conscience*, was understood to mean no longer our respective shares or amounts of the common quality *conscience*, but to be two distinct individual *consciences*, mine and yours. Where the word has continued to be used without the article, as in 'the dictates of conscience', orig. parallel to 'the dictates of prudence' or 'of common sense', the prevalent tendency is to personify Conscience as 'this Deity in my bosom'. In the 15–16th c. the word appears to have been often, by reason of its final *s* sound, associated with plurals like *wits, brains, bowels*, as *patience* is still in dialects. Cf. the illiterate spellings *consions, conchons*, etc.: hence apparently *conscion-* in CONSCIONABLE, CONSCIONED, CONSCIONLESS.]

II. Consciousness of right and wrong; moral sense.

4. The internal acknowledgement or recognition of the moral quality of one's motives and actions; the sense of right and wrong as regards things for which one is responsible; the faculty or principle which pronounces upon the moral quality of one's actions or motives, approving the right and condemning the wrong.

Opinions as to the nature, function, and authority of conscience are widely divergent, varying from the conception of the mere exercise of the ordinary judgement on moral questions, to that of an infallible guide of conduct, a sort of deity within us. Popularly, the word is often used for the whole moral nature; for its gradual individualizing and personification in this sense, see note in etymology.

3. *Psychol. Faculty of conservation*: memory proper, or the power of retaining knowledge, as distinguished from reproduction or reminiscence, the power of recalling it.

1836–7 Sir W. HAMILTON *Metaph.* (1877) II. xx. 13 Some have a strong faculty of conservation, and a feeble faculty of reproduction. *Ibid.* II. xxx. 206 Aristotle distinguishes Memory (μνήμη), as the faculty of Conservation, from Reminiscence (ἀνάμνησις), the faculty of Reproduction.

4. *Nat. Philos. Conservation of energy* or *force*: the doctrine that 'the total energy of any body or system of bodies is a quantity which can neither be increased nor diminished by any mutual action of those bodies, though it may be transformed into any one of the forms of which energy is susceptible'; and that the universe is such a system, of which the total energy remains the same in amount, amid all the changing forms in which it may exhibit itself. So *conservation of mass*, etc.

App. the phrase originated with Leibnitz: see quot. *Conservatio virium vivarum*, in Fr. *conservation des forces vives*, was in common use in the 18th c.: cf. VIS VIVA. In 1807 Young introduced the term ENERGY. In 1847, Helmholtz published a treatise *Über die Erhaltung der Kraft*; in 1853, Rankine defined 'conservation of energy' as a technical phrase. See CORRELATION *of forces*.

Sc.* (ed. 3) 56 The true modern originators and experimental demonstrators of the conservation of energy in its generality were undoubtedly Colding of Copenhagen and Joule of Manchester. *Ibid.* 361 The only man who ever tried to discover experimentally what might be correctly called Conservation of Force was Faraday.

5. *Astron. Conservation of areas*: the describing of equal areas in equal times by the radius vector of a planet moving in its orbit.

1865 A. S. HERSCHEL in *Intell. Observ.* No. 47. 338 The law of 'conservation of areas'. 1867 DENISON *Astron. without Math.* 203 This is called the law of conservation of areas; and it is only the same thing in other words as saying that the angular velocity in any given orbit varies inversely as the square of the distance.

2. The most common current designation of one of the two great English political parties, the characteristic principle of which is the maintenance of existing institutions political and ecclesiastical. (*With capital C.*)

The word was first used in this sense by J. Wilson Croker in an article published on 1 Jan. 1830; and almost immediately largely took the place of the term Tory (originally reproachful), which had been in use for nearly 150 years. (Measures tending to preserve cherished political conditions had before this been sometimes spoken of as *conservatory*.) Preference for 'Conservative' sometimes implied disavowal of the reactionary tendencies which had sometimes been associated with earlier Toryism, and espousal of the new phase introduced by Sir R. Peel; and the name was not at first received with favour by all Tories, any more than it was admitted to be properly descriptive by their political opponents. Hence many early references ridicule the word.

4. The taking into account of anything as a motive or reason; a fact or circumstance taken, or to be taken, into account; a reason considered.

This sense ranges indefinitely between the process of considering and the fact or matter considered, without being quite identified with either: cf. Reason. Thus 'these considerations lead me'=the consideration of these facts, or these facts being considered, lead me; 'I put before you these considerations'=facts to be considered.

6. *Law.* Anything regarded as recompense or equivalent for what one does or undertakes for another's benefit; especially, in the law of contracts, 'the thing given or done by the promisee in exchange for the promise' (Langdell 1880 § 45). It may itself be a promise. No promise is enforceable without consideration, unless made by deed.

At its first appearance (see quot. 1530) it is hardly a technical term, or distinguishable from *motive*; it gradually acquired its precise technical meaning in the course of the 17–18th c. Natural affection was formerly called *good consideration*, as contrasted with *valuable c.*, or that which is deemed to have value in a pecuniary sense: the distinction is now only of historical interest.

1. An alphabetic or phonetic element other than a vowel; an elementary sound of speech which in the formation of a syllable is combined with a vowel. Applied both to the sounds and to the letters (the latter being the historically prior use).

While a vowel sound is formed in the larynx, and only receives its special quality by the conformation of the oral cavity through which it is sounded, a consonant sound is wholly or mainly produced in the mouth, or the mouth and nose. Vowels thus consist of pure voice or musical sound; consonants are either simple noises or noises combined in various degrees with voice. But a noise may itself be of a continuous and rhythmical character, as a friction, trill, hiss, or buzz, and those consonants in which this is markedly the case approach closely to vowels, and may perform the function of a vowel in a syllable. Hence 'the boundary between vowel and consonant, like that between the different kingdoms of nature, cannot be drawn with absolute definiteness, and there are sounds which may belong to either' (SWEET *Handbk. Phonetics* § 164). And there is in the consonants a regular gradation from those which come nearest to vowels and may function as vowels, to those which are most remote, and never so function. From this point of view, elementary sounds have been classed as (1) vowels, (2) semi-vowels (Eng. y and w), (3) liquids (l, r), (4) nasals (m, n, n', ŋ), (5) fricatives or spirants, *voice* (v, ð, z, ʒ, γ), and *breath* (f, þ, s, ʃ, χ), (6) mutes or stops, *voice* (b, d, g), and *breath* (p, t, k). Class 1 are more strictly the vowels *i, u*, functioning as consonants, and classed as consonants; classes 3, 4, 5, are capable, in a decreasing measure, of functioning as vowels; only class 6 have the consonantal function exclusively, *p, t, k*, being the most typical consonants. The use of the liquids and nasals as vowels or sonants is a prominent feature in Indogermanic Phonology. (See VOWEL.) Consonants may also be classed, according to the part of the mouth where they are formed, into labials (p, b, f, v, m, w), dentals, palatals, gutturals, and other minor groups. (See these terms.) In the Roman alphabet (with its Greek accessions), the historical vowels are *a, e, i, o, u, y*; down to the 16–17th c, *i* and *u* were used both as vowels and consonants, a double function served by *y* and *w* in various modern languages.

2. Applied to the letters (solely or chiefly).

Consort (kɒnsɔ̆·ɹt), *v.* [Found first in end of 16th c. The origin and early history are obscure and complicated. It is possible that the different senses had two or even three different origins. Thus, branch I was app. formed on CONSORT *sb.*[1], with the notion of 'act as a consort to'. Branch II cannot be separated from a simple verb SORT, very common from *c* 1570 onwards in all the senses 3–6 below. In sense 3 there was obviously sometimes association with L. *sors, sortem*, F. *sort* lot, fate, destiny. Branch III is intimately associated with CONSORT *sb.*[2], branch II. But even if thus originally distinct, the senses appear to have been considered as belonging to one word, and to have mutually influenced each other, for some uses combine the different ideas: cf. 4, 5, with 1; 7 with 3, 5, 6. Cf. also obs. It. *consortare* 'to consort together' (Florio, 1611), f. *consorte* mate, consort. There were also med.L. vbs. *consortare*,

The name *Solidago* was a mediæval synonym of *Consolida*, whence 'Consound' has also sometimes been erroneously used as a book-name of species of the composite genus to which *Solidago* is now applied, or of *Senecio* confounded with it.

Other med.L. forms were *conestabilis*, *conestabilis*, etc.: see Du Cange. The early development of the sense, whereby the *comes stabuli*, from being the head groom of the stable, became the principal officer of the household of the Frankish kings, and of the great feudatories, and the field-marshal or commander-general of the army, had taken place before the word came into English; the development was parallel to that of *marshal*. The earlier English uses were simply taken over from French.]

2. *spec.* a. *Constable of France*: the principal officer of the household of the early French kings, who ultimately rose to be commander-in-chief of the army in the absence of the monarch; he was the supreme judge of military offences and of questions of chivalry, and had the regulation of all matters connected with tilts, tournaments, trials by combat, etc.

The office was abolished in 1627; the title was revived by Napoleon I, but discontinued on his overthrow. An officer bearing the name of constable existed also in the households of the great feudal lords of France.

b. *Constable of England, Lord High Constable*: one of the chief functionaries in the English royal household, with duties and powers similar to those of the same officer in France.

Together with the Earl Marshal, he was the judge of the Court of Chivalry, and in early times his powers of jurisdiction were extensive. The office, which had been made merely titular a few years before, was forfeited by Edward Stafford, duke of Buckingham, in 1521; since which time the title has been granted only temporarily for particular occasions, esp. the sovereign's coronation. Thus the Duke of Wellington was Lord High Constable at the coronation of Queen Victoria.

7. The system or body of fundamental principles according to which a nation, state, or body politic is constituted and governed.

This may be embodied in successive concessions on the part of the sovereign power, implied in long accepted statutes, or established gradually by precedent, as in the British Constitution; or it may be formally set forth in a document framed and adopted on a particular occasion by the various orders or members of the commonwealth, or their representatives, as in the Constitution of the United States, the various Constitutions of France after 1790, and those of other nations, framed in imitation of these. In the case of a *written Constitution,* the name is sometimes applied to the document embodying it. In either case it is assumed or specifically provided that the *constitution* is more fundamental than any particular law, and contains the principles with which all legislation must be in harmony.

This sense gradually arose out of the prec. between 1689 and 1789: see the early quots.

b. *Dynamics.* See CONSTRAIN *v.* 1 e.

A body has in the most general case six degrees or freedom, viz. three of translation and three of rotation; if there is a hindrance to one or more of these, the motion of the body is so far constrained; hence, *degrees of constraint.* Thus if one point in the body is fixed, it cannot have motion of translation, but has all the degrees of rotation: if two points are fixed, its only motion can be that of rotation about an axis passing through these two points; it has thus one degree of freedom, and five degrees of constraint: a sphere moving between two parallel tangent planes has only one degree of constraint; a cube under the same conditions has three. *Kinetic constraint*: the condition that a body shall move subject to certain relations: e. g. that a body shall roll on a plane. *Principle of least constraint*: the theorem enunciated by Gauss in 1829, that when there are connexions between parts of a system, the motion is such as to make the sum of the constraints a minimum.

2. *adj.* in *Construct state, state construct*, in grammar of Hebrew and other Semitic languages: the form of the substantive used when standing before another having an attributive (or genitive) relation to it, which may be translated by the nominative (or other case) followed by *of*, as *bā·yith* house, *bēyth-ĕlōhī·m* house of God.

It is distinctive of the Semitic languages that in expressing such a notion as *house of God*, they do not, like the Aryan languages, put *God* in the genitive, but, retaining this unchanged, put *house* in the 'state construct'. In this form the substantive becomes accentually combined with that which follows, losing its independent stress, and undergoing various consequent changes, as loss or lightening of vowels, of inflexional consonants, etc.

The Roman reckoning of time was by the names of the two consuls for the year.

† Consu'me, *v.*[2] *Obs.* [a. F. *consume-r*, variant form of *consummer, consommer*, ad. L. *consummāre* to CONSUMMATE; cf. CONSOMME.

The proper F. repr. of L. *consummāre* is *consommer* (14th c. in Littré), but this was often spelt after its L. original, *consummer*, and by consonant-simplification *consumer*. It was thus brought into association with L. *consūmĕre*; the senses of the two verbs came also into contact in the notion 'finish, constructively or destructively', and during 15–16th c. both were entirely merged in the forms *consomm-er, consummer, consumer*. Subsequently they have been partly differentiated; but *consommer* with its derivatives *consommation*, etc. still retains the sense of 'consume victuals', which belongs etymologically to *consumer*. Cf CONSUMATION. In English, the confusion, which we originally received from Fr., was rectified at the Revival of Learning in the 16th c.]

Contemplate (kɒ̈ntĕmplēt, kɒ̈nte·mplēt), *v.* [f. L. *contemplāt-* ppl. stem of *contemplāre, -ārī*: see Contemple.

In a few rare cases (Shaks., *Hudibras*) stressed *co·ntemplate* in 16-17th c.; also by Kenrick 1773, Webster 1828, among writers on pronunciation. Byron, Shelley, and Tennyson have both modes, but the orthoepists generally have *conte·mplate* down to third quarter of 19th c.; since that time *co·ntemplate* has more and more prevailed, and *conte·mplate* begins to have a flavour of age. This is the common tendency with all verbs in *-ate*. Of these, the antepenult stress is historical in all words in which the penult represents a short Latin syllable, as *acce·lerate, a·nimate, fa·scinate, ma·chinate, mi·litate*, or one prosodically short or long, as in *ce·lebrate, co·nsecrate, e·migrate*; regularly also when the penult has a vowel long in Latin, as *a·limate, a·spirate, conca·tenate, de·nudate, ela·borate, i·ndurate, pe·rsonate, ru·inate* (L. *alīmo, aspīro*, etc.). But where the penult has two or three consonants giving positional length, the stress has historically been on the penult, and its shift to the antepenult is recent or still in progress, as in *acervate, adumbrate, alternate, compensate, concentrate, condensate, confiscate, conquassate, constellate, demonstrate, decussate, desiccate, enervate, exacerbate, exculpate, illustrate, inculcate, objurgate*, etc., all familiar with penult stress to middle-aged men. The influence of the noun of action in *-ation* is a factor in the change; thus the analogy of *co·nsecration, co·nsecrate*, etc., suggests *de·monstration, de·monstrate*. But there being no *remonstration* in use, *remo·nstrate*, supported by *remo·nstrance*, keeps the earlier stress.]

Contemporary is the original form, and that approved by Latin analogies; cf. the preceding and following words. But the variant *co-temporary* was used by some in the 17th c., and though characterized by Bentley as 'a downright barbarism', it became so prevalent after *c* 1725, as almost to expel *contemporary* from use. Towards the end of the 18th c., the latter rapidly recovered its ground, and *cotemporary* is now used by comparatively few. It has been defended on the ground that it is a purely English formation, like *co-divine, co-glorious* (see Co- 2); but this is a mere fancy generated by mechanically dividing the word, without regard either to its history or to its meaning. Historically, *contemporary* is a substitute for *contemporal* and *contemporane* (either of which might well have been retained instead); in signification, *co-temporary* would analogically mean 'unitedly, conjointly, or equally temporary', whereas *contemporary* has no affinity with the English sense of 'temporary', and no connexion with that word except that both are derivatives of L. *tempus* and its adj. *temporārius.*]

b. *Law or principle of continuity*: the principle that all change, sequence, or series in nature is continuous, and that nothing passes from one state to another *per saltum*.

The phrase originated with Leibnitz. In 1687 he laid down as a general principle, that where there is continuity between data, such that one case continually approaches and at length loses itself in another, there will be a corresponding continuity in results or properties. For example, it is a property of the ellipse that all rays from the one focus are reflected from the curve to the other; in the parabola all such rays reflected at the curve are parallel; if there be given a series of ellipses continually approaching the parabola by the continuous increase of distance between the foci, the focal radii of these will continuously approach the relation of parallelism, so as at length to differ from it by less than any assignable amount. This was according to Leibnitz 'a principle of general order', having its origin in the mathematical infinite, absolutely necessary in Geometry, but holding good also in Physics, because the Sovereign Wisdom, the source of all things, acts as a perfect Geometer, and according to a harmony that admits of no addition. In 1702 he referred to this principle as 'the law of continuity', and claimed that it operates in all natural phenomena; and in his *Nouveaux Essais*, he declared it to be part of his 'Law of Continuity' that everything in nature goes by degrees, and nothing *per saltum*.

Per contra, It. 'over against, against, opposite' (Florio), is commonly used in the sense 'on the opposite side of the account, on the other hand, as a set-off'. See PER.

1648 *Hamilton Papers* (Camden) 176 He is satisfied and laboures the contra. 1849 *Sk. Nat. 2. A thing which is against another; a crossing vein in a mine.

1778 W. PRYCE *Min. Cornub.* 103 All veins crossing each other, may be termed Contras in respect of each other.

b. Hence as *vb.*

1778 W. PRYCE *Min. Cornub.* 318 When two Lodes run across, the one, or either of them with respect to the other, is called a Caunter, or Contra, for they run caunting, or contra-ing each other.

Contra-, *prefix.* The L. adv. and prep. *contrā* (see prec.) came to be used in composition; this use, rare in cl. L., was much extended in late L. and Romanic. In the modern Romanic langs., the prefix retains the L. form, except in Fr., where it has duly become *contre-*. In words taken into English from OF., this became COUNTER-, which is the predominant form of the prefix: *contre-* appears in a few non-naturalized words from modern French. But in words derived directly from L. or It., or formed after these, *contra-* is retained, with the following uses:

1. In L. *contrā*, construed adverbially with certain verbs, tended at length to be written in combination, as *contrā dīcere*, later *contrādicere*, 'to speak on the opposite side', hence 'to speak in opposition (*to* a statement or person)', and so 'to contradict'; *contrā-pōnere* to place on the opposite side, to counterpose; *contrā-scrībere* to write opposite, to countersign; *contrā-venire* to come in the opposite direction, oppose, whence to contravene.

The later tendency has been to treat the prefix prepositionally, so making the compound transitive. Verbs and esp. verbal derivatives of this type are numerous in English: cf. *contra-acting, -distinguish, -divide, -collucta'tion, -rotation*, etc.

2. In late or med.L. *contra-* was used in prepositional combination with an object, as in *contrājūris* = Gr. *παράνομος*, contrary to law. This was much developed in Romanic, and extended to the formation of sbs., *e.g.* in 16th c. It. *contrabando* that which is against proclamation or statute, contraband, *contrapelo* what goes against the hair or grain, *contrastomaco*, etc. Eng. has several adjs. so formed, and some sbs., as *contra-civil, -focal, -rational, -regular, -scriptural, contraregularity*, etc.

3. *Contra-* is used in Romanic to indicate a thing made or acting against, in opposition to, in reply to, or as a substitute for, another of the same kind. Probably these were orig. akin to class 1, but in course of time some of them tended to the notion of class 2: cf. 16th c. It. *contralettera* reply or opposition-letter, *contramuro* an opposition wall, *contramina* an opposition mine, *contrascarpa* a counterscarp, and many terms belonging to attack and defence; *contramaestro* the master's mate in a ship, *contratossico, contraveleno* counterpoison, antidote; cf. *contra-approach, -proposal, -remonstrance*, etc.; but the ordinary Eng. repr. is COUNTER-.

4. In It. *contra* is used esp. in musical terms, perh. starting from *contrapunto* counterpoint (which in its general sense belonged to 2 or 3). Thus *contrabasso, contralto, contratenore*, parts marked on the stave alongside of (above or below) and opposite to the *basso, alto, tenore*, etc.

In the names of musical instruments and of organ-stops it denotes a pitch of an octave below; as in CONTRABASS; **Contrafagotto**, the double bassoon, also an organ reed-stop of similar tone; **Contra-bourdon, Contra-gamba, Contra-hautboy, Contra-posaune**, names of organ-stops an octave lower than the ordinary *bourdon, gamba*, etc.; so **Contra-octave**, the 16 ft. octave of the organ, or the corresponding octave on other instruments.

1877 STAINER *Organ* iii, Stops..Contra Hautboy..Contra Posaune..Contra Bourdon. 1880 *Grove's Dict. Mus.* I. 253/2 Beethoven never fails to employ it [the bassoon] largely, reinforcing it in some works by the contrafagotto. 1881 C. A. (In mod. It., a single consonant following *contra* is doubled, e. g. *contrabbando, contrabbasso, contrappunto, contrammina*, etc. In dealing with the words historically, the older 16-17th c. spelling, being that which came into contact with Eng., has been used.)

†**Contra-acting**, *ppl. a. Obs.* [CONTRA- 1.] Acting in opposition: cf. COUNTERACT.

1666 J. SMITH *Old Age* (1752) 73 These..have no antagonist grinders, nor contra-acting milstones.

The original stress, after F. and L., was *contra·rie*, but the poets, from Chaucer to Spenser and Shakspere, use both *contra·ry* and *co·ntrary* (the latter the more frequent in Shaks.); of *contrā·ry*, many instances occur in 17th c. verse; it is the only pronunciation recognized by Bailey (died 1742), and it is still app. universal in dialect and uneducated speech, *esp.* in sense 3 b, which is now confined to these forms of speech and to the nursery. *Co·ntrary* was used by Milton and Pope, and is given by Johnson (though he retained *contra·rily, contra·riness, contra·riwise*) and in all later dictionaries.

Walker, 1791, says 'The accent is invariably placed on the first syllable by all correct speakers, and as constantly removed to the second by the illiterate and vulgar': where the words 'placed on' and 'removed to' should change places, but the usage described is that of the present day. Contre-dance, ‖**-danse, contra-dance.** [after F. *contre-danse*, It. and Sp. *contra danza*, all corruptions of the English word COUNTRY-DANCE, by the conversion of its first element into the F. *contre*, It., Sp. *contra* against, opposite.] A COUNTRY-DANCE; esp. a French country-dance.

The English country-dance was introduced into France during the Regency 1715-23, and thence passed into Italy and Spain; cf. Littré, s.v. *Contre-danse*², and VENUTI, *Scoperte di Ercolano* (Rome 1748) 114 'I canti, i balli..che a noi sono pervenuti con vocabolo Inglese di contraddanze, *Country Dances*, quasi invenzione degli Inglesi contadini'. The arrangement of the partners in a country-dance in two opposite lines of indefinite length easily suggested the perversion of *country* into *contre-*, *contra-* opposite. Littré's theory, that there was already in 17th c. a French *contre-danse* with which the English word was confused and ran together, is not tenable; no trace of the name has been found in French before its appearance as an adaptation of the English. But new dances of this type were subsequently brought out in France, and introduced into England with the Frenchified form of the name, which led some Englishmen to the erroneous notion that the French was the original and correct form, and the English a corruption of it. Thus a writer in the *Gentleman's Magazine* 1758, p. 174 said, 'As our dances in general come from France, so does the *country-dance*, which is a manifest corruption of the French *contre-danse*, where a number of persons placing themselves *opposite* one to another, begin a figure'. Partly under the influence of this erroneous notion as to the etymology, partly as a mere retention of the French form,

contra-dance, *contre-dance* have been used, and *contre-danse* is still in use, esp. for a French or foreign dance of this type.

CONTRA- 3) + *rotulus* ROLL. But, as the sb. appears only about 1600 in Eng., and app. not in the original literal sense, but only as a noun of action, it was probably then formed immediately from the verb. A few examples of COUNTER-ROLL (q. v.) directly represent the Fr.

Johnson (copied in later Dicts.) has as first sense, but without quotation, 'A register or account kept by another officer, that each may be examined by the other'. This J. retained from Bailey's folio, where it was founded on the statement in Kersey's Phillips, 1706, '*properly*, a Book, or Register, in which a Roll is kept of other Registers'. But this is merely an etymological remark, applicable to med.L. *contrarotulus*, and OF. *controrolle*; there is no evidence that *control* was ever so used in Eng.: see COUNTER-ROLL.]

Conventicle (kɒ́nve·ntik'l). Also 4–5 **-icule.** [ad. L. *conventicul-um* assembly, meeting, association, also place of assembly; in form dim. of *conventus* assembly, meeting, but not having in cl. L. any diminutive or depreciatory sense.

It was applied, app. by the Roman Christians themselves, to their meeting-houses, or places of worship, and is so used in the edict of Galerius, A.D. 311, permitting them to be rebuilt. In med.L. the word began to receive a derisive or contemptuous, and hence bad sense; according to Du Cange 'de hæreticis proprie dicitur'. The 4th Council of Carthage has 'conventicula hereticorum non ecclesia sed conciliabula appellantur' (Du Cange), where, however, the word itself is merely = 'assembly', or 'little assembly'; but assemblies of separatists, heretics, or reformers, being usually small and private, in comparison with the great public assemblies of the popular church, were naturally designated by the diminutive form, which gradually acquired from this association an unfavourable connotation. In English, the word has been used in the good or neutral sense received from ancient Latin; also, in the opprobrious sense in reference to private or clandestine meetings, first of a civil or political, and afterwards of a religious character. Although the ecclesiastical application arose directly out of the political, and was never thoroughly distinct from it in English Law, it was in common use largely affected also by the mediæval association with meetings of sectaries or heretics. Cf. F. *conventicule*, 16th c. in Littré, 'prohibition des conventicules [pour le protestantisme]'. In all the early verse quotations, from Shakspere, Beaumont and Fletcher, Daniel, Crowne, Butler, Dryden, etc., it is accented *co·nventi·cle* or *co·venti·cle* (riming in *Hudibras* iii. ii. 1388 with 'stickle'); Bailey's folio, 1730–6, accents *co·nventicle*; and Cowper, *Task* II. 437, originally wrote 'the nasal twang. At co·nventi·cle heard', but altered it in ed. 3 (1787) to 'Heard at conve·nticle'.]

† 3. A meeting or assembly of a clandestine, irregular, or illegal character, or considered to have sinister purpose or tendency. *Obs.*

In many of the quotations *conventicle* is associated with other terms, as *congregation*, *gathering*, *assembly*, the unfavourable sense being conveyed by the context; but it is evident that the term came to be considered as specially fitted to express disapprobation. (Cf. sense 2, quot. 1655.)

b. *spec.* in *Eng. Hist.* A meeting of (Protestant) Nonconformists or Dissenters from the Church of England for religious worship, during the period when such meetings were prohibited by the law.

This specific application gradually became distinct after 1593, and may be said to have been recognized by the 'Conventicle Act' of 1664; for although the word there occurs in constant conjunction with *assembly* and *meeting*, and always with qualification, it was entitled 'An Act to prevent and suppress seditious conventicles', by which title it is cited in the Act of Toleration of 1689. The application to Nonconformist worship after its legalization or 'establishment' in 1689, and esp. after the repeal of the Conventicle Act in 1812, comes, according to circumstances, from a historical survival of the idea of illegality or from a living idea of schism or heresy.
